

MUST BE RECEIVED BY JULY 1, 1998

NAME Philip G. Mullen
ADDRESS 3628 EL CAMINITO
CITY/STATE/ZIP LA CUCESSENTA, CA 91214

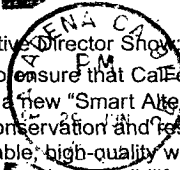

Dear Executive Director Snow:
I urge you to ensure that CalFed puts forth
and selects a new "Smart Alternative"
based on conservation and restoration to
provide reliable, high-quality water for
California's people and wildlife. The "Smart
Alternative" would:

- * ensure strong conservation programs
and economic incentives to use our water
more efficiently;
- * maximize water efficiency before even
considering costly new dams and
reservoirs or a Peripheral Canal;
- * restore and protect our watersheds
and groundwater basins;
- * restore California's fish, birds, wetlands,
rivers, delta and bays.

Please enter these comments into the
formal record for your Draft Programmatic
Environmental Impact Report and State-
ment.

Sincerely,

P. G. Mullen

*SUBSIDIZED WATER
TO BIG CORPORATIONS
FOR FARMING HAS TO
STOP.*
